A new feature is available on [www.linuxhowtos.org](http://www.linuxhowtos.org).

There is a new icon in the top right corner of every page that allows you to save the currently displayed page as a standalone pdf file for later use.

This feature is not 100% completed yet, but it works quite well. The most important missing feature is the lack of embedding the images into the file. This will be added soon.

If you have any problems or find some bugs, please drop a mail to bugs (a) linuxhowtos.org with the url of the damaged pdf file.

Please read "Why adblockers are bad".

<div id="wikilogin" title="Edits you make while logged in will be assigned to that name. That means you get full credit for your contributions in the page history (when not logged in, the edits are just assigned to Anonymous.)">
