Today a new plugin was put live to enable anyone (for example: you) to change articles where you notice there is something wrong or missing. The editing is easy and uses a wiki-like syntax.

Note, this is not a full wiki.
Making a link to a non-existing page will result in a "file not found" error. Creation of new pages is not yet finished. Those pages will be created differently.

Not all existing wiki-commands work. As said, there is no wiki software behind this site.

If you want to be credited with your contributions, create a forum account and log in using the login form on the top right corner of this site.

Not all articles are editable (yet). Editable articles are marked with an [e] in front of the teaser and have an "edit" link in the top right corner.
