You are here:

## while compiling packages you get as segfaults

### Fix/Answer

Short summary of circumventing the problem (from forums):

#1 emerge a binary package (.tbz2) of an earlier version of binutils (e.g. -r1), if you didn't make yourself ones of previous versions, use:

x86: <http://dev.gentoo.org/~vapier/dist/x86-binutils-2.15.92.0.2-r4.tbz2>

amd64: <http://dev.gentoo.org/~vapier/dist/amd64-binutils-2.15.92.0.2-r4.tbz2>

#2 mask -r3 in /etc/portage/package.mask:

```
echo "=sys-devel/binutils-2.15.92.0.2-r3" >> /etc/portage/package.mask
```

#3 (suggested) reemerge binutils

#4 monitor this bug and remove mask from #2 if it is fixed.

### Description:

There is a bad patch (53\_all\_gcc4-lovin.patch.bz2) in binutils-2.15.92.0.2-r3.
